VIGLACERA

CONCRETE

EFFECT

VIGLACERA

Our product portfolio has been designed with completeness in mind.

From natural effects comprising of Wood, Stone and Marble, through to the simplicity offered by the Concrete Effect, the richness and clarity goes hand-in-hand. The four effects present distinctive surfaces and textures by utilising unique production processes to produce the highest quality finish.

The individual collections combine a range of sizes and suitable applications resulting in a complete portfolio with vast selection of choices. From architectural specifications to private use, Viglacera products lead the way.

CONCRETE

EFFECT

The trueness of the reproduction of the actual stone is the creation of the highly experienced tile masters of Viglacera. Multi-layered and specialist printing techniques, combined with multi-faceted impressions, the ranges can be applied to large areas to create a semblance of amplitude. The ranges include a mixture of gentler presence as well as truly distinguishing effects.

VIGLACERA

COLLECTIONS

BRUSHED CEMENT

CEMENT STONE

CONCRETE

EFFECT

BRUSHED CEMENT

Resembling concrete with softened metallic tones and light smooth base

The collection features a fine earthiness in its varying tones and stark hues from tile to tile. The concrete look creates an air of industrialism whilst being versatile in its application for a range of design schemes. You can bring the rawness of the original material to life with large scale installations and feature walls.

CONCRETE

EFFECT

CEMENT STONE

Inspired by the appearance of sharp granite combined with the softness of leather, the collection offers versatility and aspiration.

Each tile surface is adorned with unique swirls like the changing winds in the sky, strong yet subtle from a far. The rustic reproduction of softened cement like surface designs in five colourways are befitting for a range of spaces bringing with them character and form. Before storm there is calm and when applied to larger areas the true gentleness of the tile pattern comes to life.

The four effects present distinctive surfaces and textures by utilising unique production processes to produce the highest quality finish.

The individual collections combine a range of sizes and suitable applications resulting in a complete portfolio with vast selection of choices. From architectural specifications to private use, Viglacera products lead the way.

STONE

EFFECT

The new Stone Collection from Viglacera presents a creative blend of asperity, opulence and genuity. Each collection is carefully thought out and balances well with both soft and sharp interior schemes. Some ranges are rustic in nature whilst still offering a touch of class. There are some ancient characteristics that can be discovered for added richness.

COLLECTIONS

RUSTICA LOFT

PIETRA FRACESA

STONE

EFFECT

PIETRA FRACESA

With its silvery tones and accented colourways the collection conceives a high-end classy ambience

Featuring a burnished surface with soft casual patterning, the finished look gives a sense of comfort and unity. Each tile design resembles a copper like pattern that is multi layered with hues of platinum and silver. The shades of the tiles are blended to create an overall look with variation and distinction.

GALASSIA GREY

Truly striking with strong impression and timeless beauty.

Galassia marble is highly sought after due to its magnificent charm and might. Galassia creates a compelling statement piece with large swathes of pure white and true black venation. The tiles within the collection have multiple tile faces which enables the creation of large, attention grabbing feature walls for the ultimate luxury display.

MARBLE

EFFECT

MODICA GREY

The fresh translucent greys and with slight blue tones in this collection form a two-toned impression with appeal.

The surfaces depicting cool, almost arctic like, greys creates strong contrasts within each tile and design. There is a unique depth and detail within the pattern with broad veining and distinctive characteristics which originate from the nature and the formation of stone over time. The overall impression is that of brightness and grandiose.

MARBLE

EFFECT

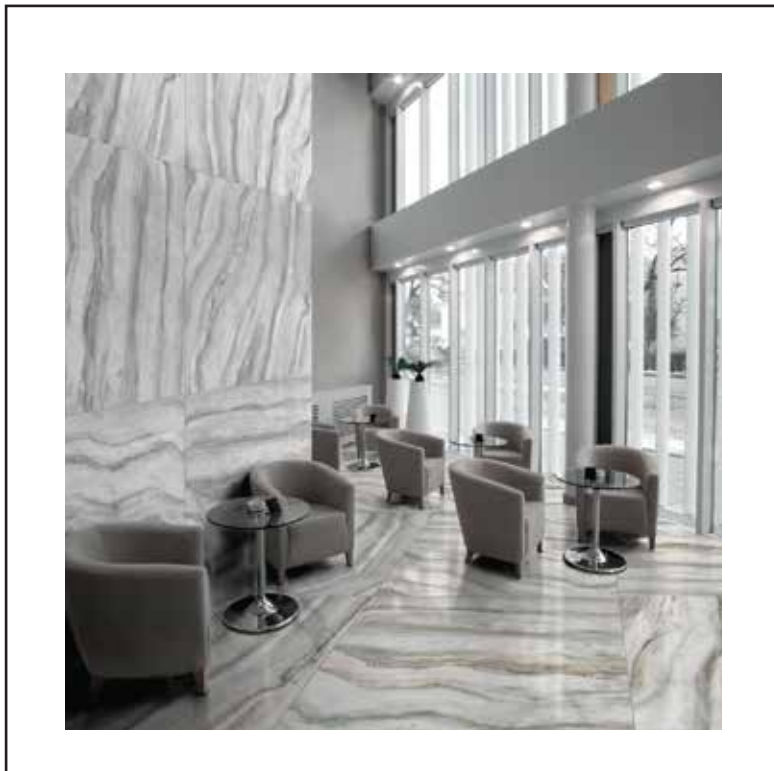

ONICE

A true classic with softness and grandeur

The gentleness of the Onice marble mirrors the appearance of slowly lapping waves on the shoreline or that of cloudy sky. The calm blend of subtle contrasts of colour within the veining produces a fine classic end result with charisma. Multiple tile faces allow flowing designs.
